TECH TIP: Ignition Upgrade

Improve your vehicle's performance with a high-performance electronic ignition system. Our high-powered system installs in under three hours and includes an on-board computer, ultra ignition coil, and high-performance wires and separators. Once installed, it "reads" your engine to adjust spark output cylinder-by-cylinder, to give you smoother running at any temperature, any speed, any rpm, any altitude, and in any weather. (Will not work on distributor-less ignition system.)
